Alexandria, VA 22313-1450

PETITION UNDER 37 C.F.R. § 1.10(d)

Dear Sir:

Applicants respectfully petition to correct the filing date associated with the above-identified application. The current filing date of August 18, 2003 is incorrect. The application was deposited with the U.S. Postal Service (USPS) on August 19, 2003 using Express Mail Label No. EV334067866US. Applicants note that the Express Mail Label No. is included on the Transmittal Letter (page two, item 12) and on every page of the specification (right-hand side of the header). True copies of relevant pages from the Transmittal Letter and specification are enclosed with this Petition as Exhibit A.

A true copy of the Express Mail label is enclosed as Exhibit B, and the "Date In" portion of the label noted by a USPS employee correctly reflects the August 19, 2003 filing date. Also enclosed as Exhibit B is a copy of a page from our firm's Log of Express Mail Deposits in Accordance With MPEP

513. The last entry on the page correctly reflects that Express Mail Label No. EV334067866US was deposited with the USPS at 2:30 PM on August 19, 2003.*

Finally, enclosed as Exhibit D is a print-out of a USPS diary associated with the delivery of Express Mail Label No. EV334067866US. The diary correctly reflects that the Label was deposited with the USPS on August 19, 2003. Applicants note that the diary is available to the public via:

<http://www.usps.com/shipping/trackandconfirm.htm>

This error was pointed out by the US Patent Cooperation Treaty (PCT) Receiving Office in a Notification received by Applicants on September 24, 2004. Therefore, the present Petition is believed to be timely.

The Commissioner is hereby authorized to charge any fees associated with this Petition to Deposit Account No. 50-1852.

In view of the foregoing, correction of the filing date to August 19, 2003 is respectfully requested. Please direct any inquiries to Applicants' attorney using the contact information provided below.

October 5, 2004
Date

Respectfully submitted,

Patrick J. Buckley

COMPUTER SYSTEM POWER POLICY ADJUSTMENT IN RESPONSE TO AN AFFIRMATIVE INDICATION FROM A USER

BACKGROUND

A system, such as a Personal Computer (PC), may enter a low-power state during a period of relative inactivity. For example, a PC might automatically enter a sleep state when not being used in order to reduce power consumption. As a result, energy can be conserved, the PC may operate more quietly (*e.g.*, because a fan might not need to cool a processor), and/or battery life may be extended.

In some cases, the system may automatically enter a sleep state in accordance with a timeout period. For example, a user may configure a power policy such that the system will automatically enter a lower-power state when there has been no keyboard or mouse activity for five minutes (*e.g.*, and thus the user is probably not currently using the system).

BRIEF DESCRIPTION OF THE DRAWINGS

FIG. 1 is a block diagram of hardware and software power management components according to some embodiments.

FIG. 2 is a block diagram of a system according to some embodiments.

FIG. 3 is a flow chart of a method according to some embodiments.

FIG. 4 is an example of power policies according to one embodiment.

FIG. 5 illustrates one example of power state transitions.

FIG. 6 is a flow chart of a method according to some embodiments.

FIG. 7 illustrates a computer system according to some embodiments.
